

SREE LASYA BALAJI

Boston, MA 02120 | +1 (857) 308-6305 | balaji.sree@northeastern.edu | [LinkedIn](#)
Available from January 2027 for Co-op or Internship

EDUCATION

Northeastern University, Boston, MA — Khoury College of Computer Sciences Jan 2026 – May 2028
Candidate for Master of Science in Computer Science | GPA: 3.6/4.0
Related Courses: Database Management Systems, Machine Learning, Foundation of Artificial Intelligence

Sreenidhi Institute of Science and Technology, Hyderabad, India Jun 2025
Bachelor of Technology in Computer Science & Engineering |
Related Courses: Data Structures & Algorithms, Computer Networking, Operating Systems

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS
ML / AI: Machine Learning (SVM, KNN, Naïve Bayes, Random Forest), TensorFlow, Computer Vision, OpenCV, Prompt Engineering, Generative AI Prototyping
Data & Databases: SQL, MySQL, MongoDB, Exploratory Data Analysis, Data Validation
Data Visualization: Tableau, Power BI
Web Technologies: React, Django
Tools: Git/GitHub, Version Control
Cloud & Certifications: AWS Academy Machine Learning Foundations, AWS Academy Data Engineering, AWS Academy Cloud Foundations, AWS Academy Cloud Architecting

PUBLICATIONS

Novel Approach for Cyberbully Detection Using Neural Networks
International Journal of Novel Research and Development (IJNRD), Jul 2024 | [View Paper](#)

Single-Image Haze Removal for Enhanced Vision Applications
Grenze International Journal of Engineering and Technology, Aug 2025 | [View Paper](#)

PROJECTS

University Budget Management System (UBMS) Feb 2026 – Apr 2026

- Developed a centralized system to manage university finances, integrating modules for tuition, payroll, scholarships, and expenses, with role-based dashboards, automated workflows, and real-time analytics.

Spam Mail Detection (Machine Learning) Mar 2024 – Jul 2024

- Built and evaluated multiple machine learning models (Naïve Bayes, SVM, KNN, Decision Tree, Random Forest) to classify emails as spam or ham, applying NLP preprocessing and systematic performance comparison to select the most effective model.

Road Safety Image Enhancement (OpenCV) — Published Research Jan 2025 – May 2025

- Developed and validated a computer vision pipeline to enhance visibility in adverse weather conditions (fog, rain, haze) using Dark Channel Prior, guided filtering, and CNN-based parameter tuning; findings published in two peer-reviewed journals (see Publications).

WORK EXPERIENCE

AI Instructional Assistant, CATLR – Northeastern University Sep 2026 – Present

- Partner with faculty leading AI Curriculum Transformation at the D'Amore-McKim School of Business and College of Professional Studies to build AI competencies and integrate GenAI into coursework.
- Research how peer institutions and discipline-specific professions approach AI use in teaching and learning, informing curriculum recommendations.
- Prototype and test generative AI tools and prompting approaches for course assignments, applying Python and prompt engineering skills to assess model outputs for effectiveness and safety.
- Support development of scalable AI-informed learning experiences; document effective practices for CATLR's Teaching with AI resources and present findings in weekly meetings.

ACTIVITIES & VOLUNTEER EXPERIENCE

Student Coordinator, Sreenidhi Institute of Science and Technology Aug 2023 – Jan 2024

- Peer-mentored orientation for 1,000+ incoming students; handled 20+ weekly student queries and escalations.

Public Relations Head, Student Alumni Relationship Cell (SARC) – SNIST Dec 2023 – Dec 2024

- Led student-alumni communication and organized the Annual Alumni Meet (Rendezvous'24); used survey feedback to shape programming.

Designing Head, Sreenidhi Photography Club Dec 2022 – Dec 2023

- Facilitated workshops for 150+ members and led promotional/digital content for club events.
- Engaged with generative AI (Claude.ai) for academic work and prompt engineering; active in ARTS Club, IEEE Club, and campus volunteering (2022–2025).
